

1) I recommend changing this marked icon:

Because it seems like I will deal with AI model but it's not.

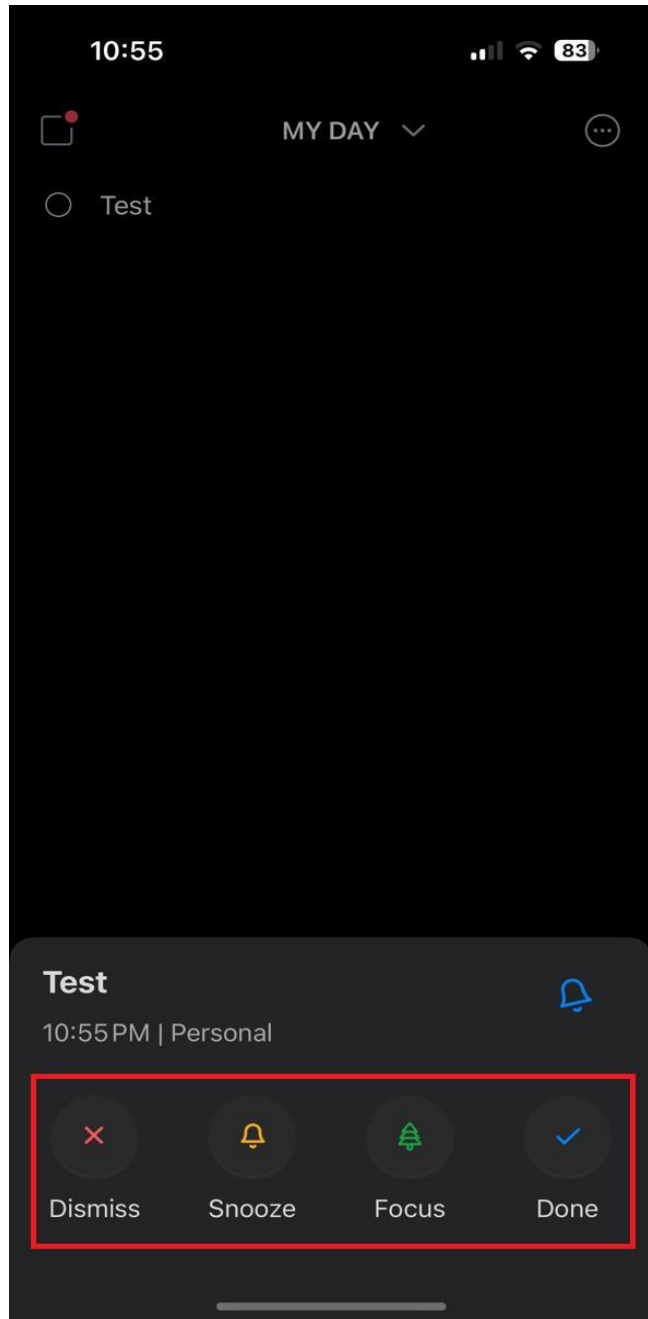

2) I recommend combining all alarm features (Picture 1) to be in the main notification in home screen (Picture 2):

Because it could be easier for user to control it without entering the app

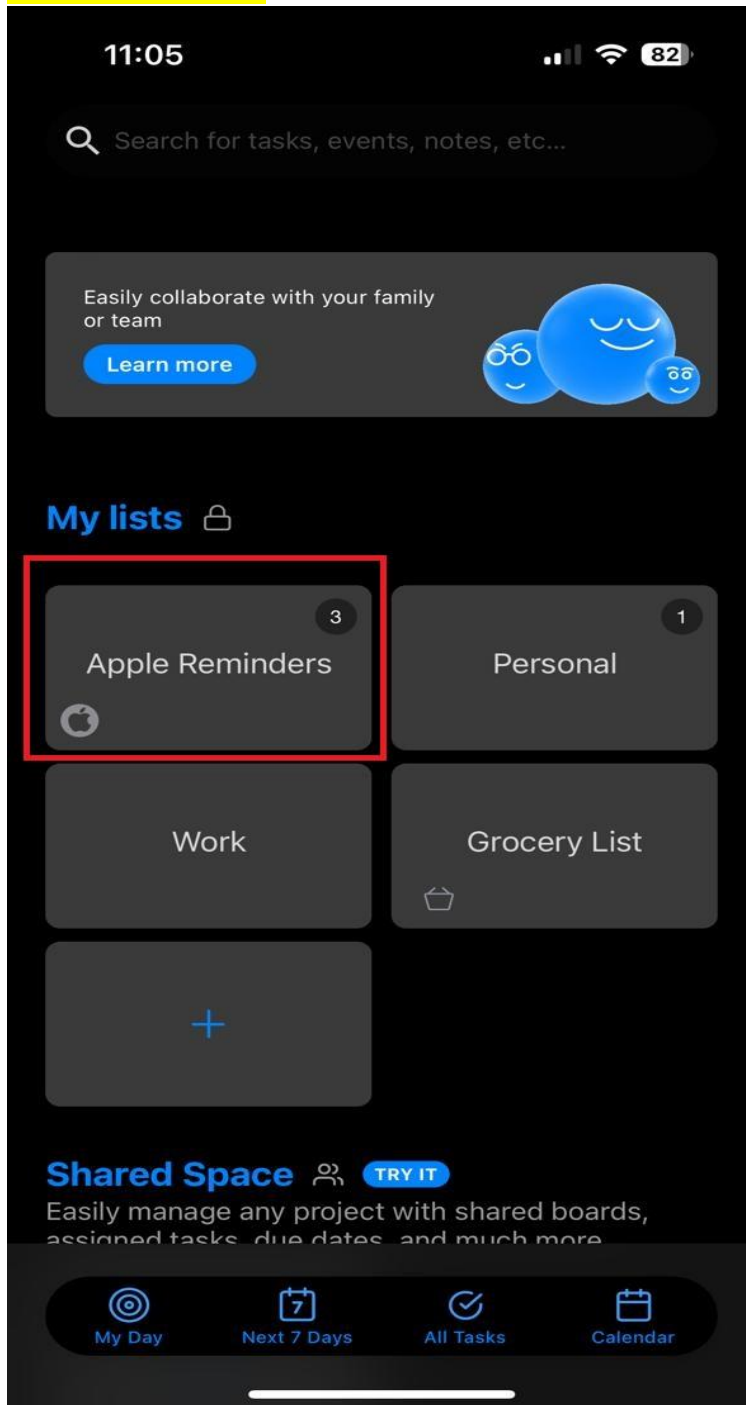

Picture 2

Picture 1

3) I recommend making Apple Reminders undeletable:

Because it is feature in this app and when user delete it he could not recover it again so he will miss this feature

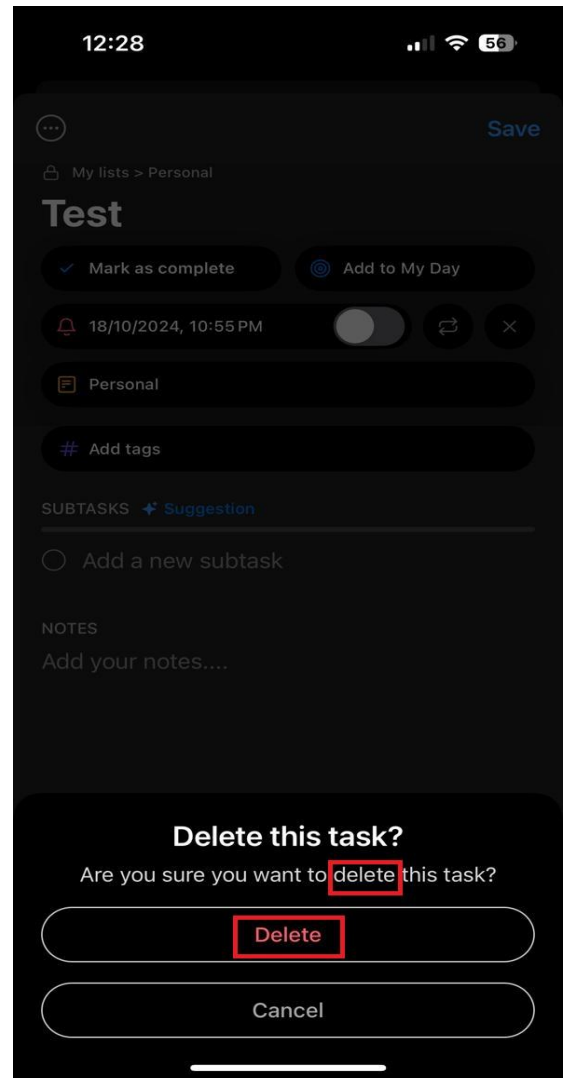

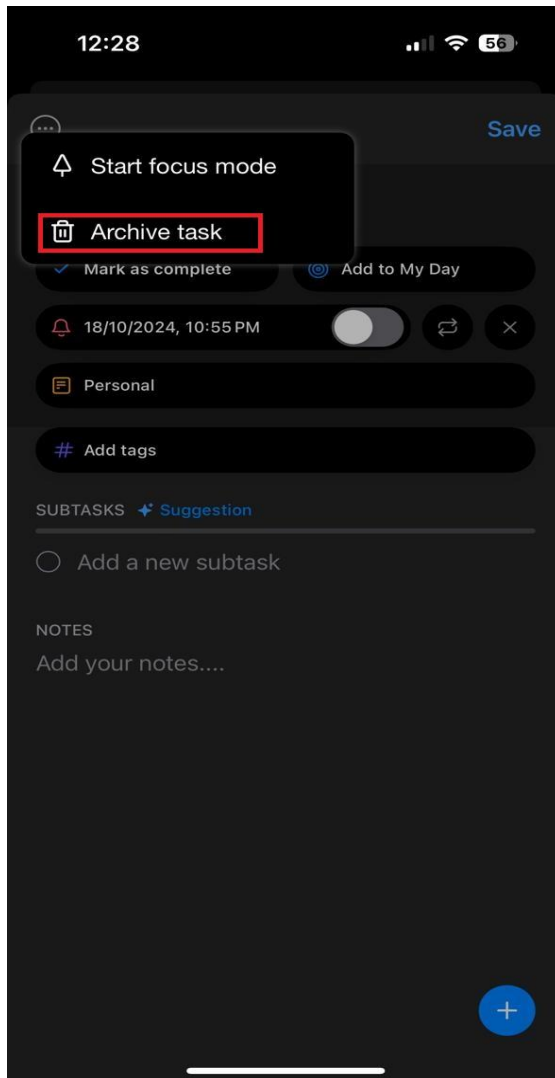

4) Task option should be Delete task instead of “Archive task”:

Because the action is (delete) not archive

Steps:

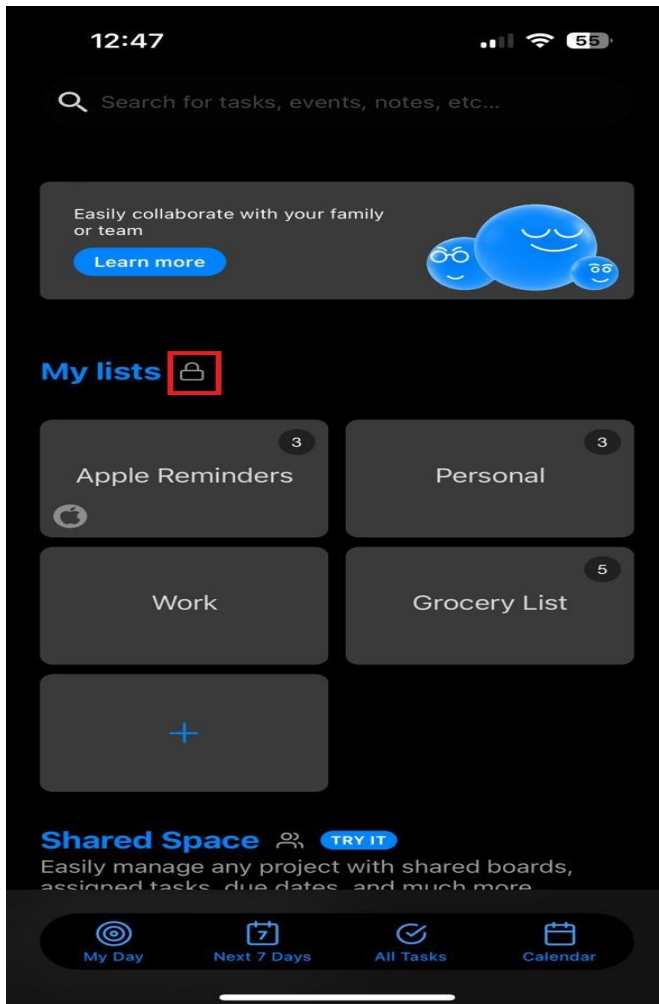

- 1- Click on any task
- 2- Click on triple dot up left the app
- 3- Select “Archive task”

- 5) I recommend changing lock icon with hide eye icon here:  
Because "lock icon" related to give password to unlock, that does not happen here

Hide eye icon

- 6) I recommend adding all days to “Week starts on” option:  
To cover all user needs
